

PREFERRED DRUG LIST— CONDENSED

This is a condensed version of the UHA Preferred Drug List (PDL) in a convenient four-column format. This document is intended to provide an easily printable formulary reference for clients, plan participants, and health care providers.

This list contains generic and preferred brand-name products, listed alphabetically by category. Generic products appear in **boldface** type and are listed by generic/chemical name with brand name in parentheses. Where only a generic name is listed, the brand product has been discontinued, but the generic remains available. Brand products are represented in all CAPS. It is important to remember that this PDL's intent is to cover only the generic forms of the drugs when available and not the brand forms. **There is a higher copayment for brand-name drugs that have an approved generic available.**

In order to reduce the risk of adverse effects to our members, UHA will not cover prescription drugs when prescribed for experimental, investigational, or non-FDA approved indications unless there is sufficient peer-reviewed literature to support their use for the prescribed indication.

Please note:

- This drug list is not a guarantee of coverage for all conditions or on all benefit plans. Refer to your benefit plan for specific details.
- Some plans require prior authorization for certain drugs or have quantity limitations. Medications requiring prior authorization are identified by a **PA** indicator placed after the brand name.
- This drug list should not be deemed a recommendation to providers for any specific patient or condition. Independent professional judgment must be exercised by providers overseeing patient care.
